

Spread it & Forget it Certified Blend 43-0-0

Application Rates

Spread it & Forget it fertilizers are designed to last for six months or more. In order to get the longest lasting results, *Spread it & Forget it* products need to be applied at a higher than normal application rate. It is important to always read and follow label directions. The table below illustrates the spread rates of a common *Spread it & Forget it* blend with 43% nitrogen.

Use Rate Calculations assuming 43% nitrogen (N)

| Pounds of N per 1,000 sq. ft. | Pounds of Product per 1,000 sq. ft. | Pounds of Product per Acre | Rate Range |
|-------------------------------|-------------------------------------|----------------------------|------------|
| 2.0 | 4.7 | 202 | Low |
| 2.5 | 5.8 | 253 | Medium |
| 3.0 | 7.0 | 304 | High |

Spread it & Forget it fertilizers, are very uniform and easy to apply. For best results, you should always calibrate your specific spreaders and equipment to ensure you are applying the proper labeled rates. The table below shows settings for commonly used spreaders, using a *Spread it & Forget it* fertilizer blend with 43% nitrogen in a size range of 250-260 SGN. For more information contact your local fertilizer supplier or visit www.SpreaditandForgetit.com.

| Spreader Type | Application Rate | Spreader Setting | Notes |
|-------------------------------|-------------------------------|-------------------|---|
